

EASILY CONSTRUCTED SAFETY FENCE SYSTEM

Safety standard requirements have never been as demanding as today. National and international standards have to be considered. Quickly changing production requirements and continuous upgrades and adaptations require a flexible and time-saving Safety Fence System.

Order completely pre-assembled components that are easily and quickly installed. Nothing is so simple and safe as the Safety Fence System from Robotunits.

Turn-key offer

- included in the price and delivery: ready-to-insert, completely assembled elements (including safety fence foot and connectors between elements)
- modular safety fence system with flat and door panels
- standard widths from 518 mm to 1507 mm or special-width panels
- standard height 2200 mm or special height panels

Ready to install

- easy installation of fully assembled panels
- minimum installation time

One Mesh Clip, many functions

- impact rated up to 80 kg at 10 km/h
- small number of parts
- visually appealing design

High flexibility

- quick installation of all panels
- panels can be easily removed to gain access to machine area
- adjustable to any angle

Easy installation

- only one person required for setup
- only one Allen wrench size needed
- reusable components

Fully integrated Safety Fence System

- uniform slot size and shape
- completely compatible with entire Modular Automation System
- quick and easy attachment of accessories
- use of standard screws and standard panels

Save time, cut cost

- no additional design expenses
- simple panel selection
- efficient one-person installation
- simple adjustment and setup on-site
- just one order code for the complete safety fence panels
- easy attachment of accessories (safety switches, etc.)

Safety

- complete documentation
- meets European Machinery Safety Standards and the latest automotive industry specifications

Page 201

Basic System

The Basic system is the “classic” among Robotunits safety fence systems. Easy to use and low in price. Ideal for standard applications in machine design and in production automation. The Basic system is capable of stopping up to 80 kg at 10 km/h.

How does the Basic system work?

With the Basic system, the Basic panels (B) or Basic doors (D) are lined up and then directly connected with one another using Safety Fence Fasteners.

Basic System Overview

Panel Options

Weld Mesh with Weld Mesh Clip

Polycarbonate with Panel Profile

Basic Panel

Basic Doors

Single Door

Basic System Dimensions

**Panel Options:**

Weld Mesh or
4 mm thick Polycarbonate

Application

For general safety fencing

Technical Data

Material: EN AW-6063-T66 clear anodized aluminum; galvanized steel, powder-coated, chrome silver steel; black ABS V0 composite; Weld Mesh or Polycarbonate; conductive Weld Mesh and frame; Safety Fence Floor Bracket height adjustable from - 20 / + 5 mm

Scope of Delivery

Completely pre-assembled, consisting of:

- 2 Post Extrusions 40x40 PIL4140
 - 2 Horizontal Extrusions 40x40 PIL4140
 - 4 Fasteners FAS4041
 - 1 Safety Fence Fastener TIN4511
 - 2 End Caps CAP4041
 - 2 Safety Fence Floor Brackets BAP2051
- Panel option according to the order code:
- Weld Mesh with Weld Mesh Clip and Safety Fence Mesh Retainer
 - Polycarbonate with Panel Profile

Design tip:

Standard widths offer an outstanding price/performance ratio and quick delivery.

Safety Fence Application Examples

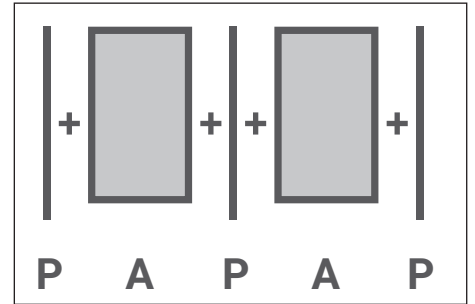

Allround System

The Allround system offers high flexibility. Panels can be attached and removed from the pre-assembled posts. This allows for easy access to the safety area without disconnecting any accessories attached to the posts, e.g. air hoses, safety equipment etc. The Allround system is capable of stopping up to 80 kg at 10 km/h.

How does the Allround system work?

In the Allround System, Allround panels (A) are fitted and bolted to the pre-assembled posts (P).
