

Faster, Easier, and More Profitable Systems Integration

Fixed Industrial Scanning and Machine Vision from ADI and Zebra

Integrating fixed scanning and machine vision solutions is all about saving time, reducing costs, and meeting end-user needs. With Zebra’s groundbreaking new solutions and a partnership with our industrial automation experts at ADI, we’ll help you complete your deployments faster, with fewer headaches and more profitability.

Save Time and Effort with a Simpler Approach to Automation

Deliver solutions faster with one unified scanning and machine vision platform.

Get jobs up and running in record time, with less hardware and less cost.

Simplify job setup with one amazingly easy-to-use software application.

Auto-tune image capture and settings with push-button simplicity.

Easily customize your optics and illumination to capture the right images.

Choose between Zebra liquid or C-mount lenses for the ideal optics.

Access simple but powerful tools for highly sophisticated image analysis.

Learn as you go with guided tutorials for beginners and experts alike.

Why Systems Integrators Are Partnering with ADI and Zebra

We Help You Complete Projects Faster and Hassle-Free

With ADI and Zebra, you can say goodbye to clunky, complicated interfaces that slow down your integrations. Zebra's Aurora software and single hardware platform mean you can configure and integrate both fixed scanning and machine vision solutions with one solution. Even the most complex jobs are as simple as using a few sliders and radio buttons to get the results you need.

We Make Your Life Easier with a Single Plug-and-Play Platform

With Zebra, you can start with a fixed scanning device and upgrade it to machine vision capabilities with a simple software license upgrade. There's one hardware platform where each device can capture up to 16 images from a single trigger event, each with its own settings, so you can get more done with less hardware. And you get all the connectivity, integration, and image analysis you need to handle even the most complex jobs with more flexibility than any other platform offers.

More Reasons to Partner with ADI and Zebra

You Get Solutions and Support from a Global Leader

Since 1969, Zebra Technologies has been a global leader in automated identification and data capture across virtually every industry. Zebra helped pioneer barcoding, RFID, and now fixed industrial scanning and machine vision solutions with an unrelenting focus on performance, quality, and value for integrators and end users.

We Open New Opportunities for Your Business

Zebra's groundbreaking new solutions, along with ADI and Zebra's global network across over 100 countries, mean we will bring leads and opportunities to you. Big players in the industrial automation space are going direct and leaving system integrators and distributors behind, but with ADI and Zebra, you can protect and grow your business with partners who are committed to the distribution and integration channel.

We Help You Get Up and Running Quickly

We'll provide you with complimentary training, plus all the tools, resources, and a dedicated integrator support team to help you get up and running quickly, so you can start delivering industrial automation solutions faster and more profitably.
